ENDO UPDATE 2025

Pituitary Disorders: Current Practice and Future Possibilities

Greetings from the Endocrine Society of Delhi!

We are delighted to invite you to **Endo Update 2025**, scheduled on **26th–27th July 2025** at **Andaz by Hyatt, New Delhi, India**. This year, the theme is **“Pituitary Disorders: Current Practices and Future Possibilities.”**

We are honored to welcome global experts like Professor Ashley Grossman (UK), Professor Michael Kosmin (UK), Professor Maria Fleseriu (USA), Professor Joseph G Verbalis (USA) and Professor Dana Erickson (USA) .

This year’s scientific programme will explore the latest developments in how we diagnose and manage pituitary disorders, with a special focus on the new technologies and treatments that are beginning to change clinical practice. The sessions are designed to bridge research and day to day care and to deepen our understanding of the many ways pituitary conditions can present in real world settings.

Over two days, you will hear from leading national and international experts through focused lectures, and there will also be dedicated sessions for oral and poster presentations, offering postgraduate students a platform to share their work and engage with the wider endocrine community.

We are confident that **Endo Update 2025** will serve as a meaningful platform for knowledge exchange and collaboration in the evolving landscape of pituitary disorders.

We look forward to your active participation and to welcoming you to **Endo Update 2025** in New Delhi.
